

**Job Title:** Geoenvironmental Consultant / Geotechnical Engineer

**Salary Band:** £20k-£27k depending on experience

**Application Deadline:** 25 January 2020

agb Environmental Ltd offers a wide range of environmental and engineering services including geo-environmental, geotechnical, ecology, arboriculture, forestry, waste and flood risk. We are an equal opportunities employer.

Based from our offices in Newmarket, Suffolk we serve the East and Southeast of England, the East Midlands and London. We have a wide range of clients including private developers, large corporations and local government.

**The Role of Geoenvironmental Consultant / Geotechnical Engineer:**

We are currently seeking a Consultant / Engineer to supplement our expanding geoscience department. The Consultant / Engineer will provide technical services to clients on the management of contaminated land / geotechnical projects. The position is an all-encompassing role focused on being the primary technical liaison for clients with support from senior staff and will regularly be out on site undertaking site walkovers, site investigations, monitoring and supervising remediation.

Principal work packages will include:

- Desk Studies,
- Site Investigations,
- Remediation,
- Remediation Verification and Validation,
- Support in the safe and technically accurate running of all geoenvironmental / geotechnical works.

In performing these tasks, the role is expected to undertake:

- Reporting to agb Environmental technical and formatting standards,
- Regulator and client liaison on technical and programme issues,
- Site works, including managing subcontractors, soil sampling and monitoring,
- Developing agb Environmental standard systems and procedures.

In addition, and as part of the business need, you may be asked to provide support and assistance in the following areas:

- Financial management, including credit control,
- Business development support,
- General business support for the safe and effective running of the business,
- Report reviews.

There may be additional tasks that you are asked to perform in relation to the business need. These will be roughly in line with the above specification.

The role will be based at our Head Office in Newmarket.

## **Person Specification**

- A BSc/MSc, in Geology or Environmental related discipline.
- 2+ years industry experience of geoenvironmental/geotechnical projects.
- Technical capability to plan, manage and undertake all Site Engineer roles associated with a contaminated land site investigation, including soil logging, sampling and monitoring.
- Has an understanding of the Contaminated Land regime in England.
- A detailed understanding of Health & Safety law requirements.
- A detailed understanding of Environmental law(s) requirements

The key attributes of the successful Principal Consultant/Engineer are:

- Excellent presentational skills in written and verbal formats.
- Articulate and with a fastidious attention to detail, especially when dealing with reports and data management.
- Understands the business need and is able to work flexibly.
- Is able to attend agb Environmental offices in Newmarket.
- Is willing to travel to meet the business need (most jobs are anticipated within the East, South East and London).
- Is honest, professional and trustworthy at all times.

## **The Package:**

agb Environmental is committed to developing its employees by supporting them with their professional development. Continued Professional Development (CPD) plays a major role in our development. Employees are actively encouraged to seek opportunities for meaningful CPD, which will be supported by managers.

We are driven by our Core Values of time, cost, quality, growth and Health and Safety, ensuring we do the best for our staff, our clients and our profession. Delivery against these Core Values is supported by a monthly award.

The package includes:

- Salary between £20k and £27k, subject to experience with regular salary reviews.
- Employer pension contribution.
- Paid for membership to one technical body / institution.
- Unlimited CPD based on business and development needs.
- Eligible for the monthly Core Values award.
